

Outperforming all others

Not only is the Kinetico K5 Drinking Water Station certified to remove more contaminants than any other system, it also offers higher production rates—producing more than 40 gallons of drinking water daily—along with higher, more sustained flow rates made possible by QuickFlo technology.

Un-bottling your life

Everyone knows bottled water is costly and wasteful. But did you also know that certain bottles are known to leach chemicals into the very water they contain? With the Kinetico K5 Drinking Water Station, you can enjoy both the best tasting, best quality drinking water on earth *and* a clear conscience.

untreated vs. treated water

A difference you can see, smell and taste

Quality Kinetico drinking water is water as it should be: clear, pure and without foul taste or odors. Water that your family can enjoy day or night, right from the tap. Water that is truly above all suspicion.

↩ Just one look and you'll understand why.

Environmentally yours

Kinetico has been the green alternative for nearly 40 years since introducing the world's first non-electric home water system. Today, we continue to develop systems that are the most efficient of any in the marketplace. Lessening our impact, conserving energy, engineering with an eye toward sustainability—it's what we believe in as a company.

Better water flows from better thinking.

Made in the USA. Put to work worldwide.

Since 1970, Kinetico has been designing and manufacturing water treatment systems right here in the USA that solve a variety of water problems. Kinetico continually develops and offers products to meet the diverse water treatment needs of people in nearly 100 countries worldwide.

Our professional promise

Kinetico dealers hold themselves to loftier standards. Whether providing a thorough analysis of your home's water, explaining how water systems work or recommending one that's right for you, one thing is certain. Nobody brings a higher degree of professionalism into your home. [We promise.](#)

Forever Pure

Kinetico's K5 Drinking Water Station alleviates all your water worries—today's and tomorrow's.

Kinetico®
home water systems

Clean, crystal clear, worry-free drinking water

The simple fact is we can no longer take the quality of our drinking water for granted. Private well water can be affected by any number of contaminating factors, while even municipally treated water that meets all federal guidelines has been found to contain bacteria, viruses and protozoa, along with a host of other contaminants.*

And while funny tastes and odor, or water that appears cloudy, can be signs of impurities, many harmful contaminants can only be detected through proper testing.

Only one drinking water system is so advanced that it can eliminate nearly everything from your home's drinking water that isn't water:

The Kinetico K5 Drinking Water Station

- Certified to remove more contaminants than any other RO system
- It's customizable to your home's specific filtration needs
- It's expandable as your water filtration needs change over time

*These contaminants are not necessarily in your water.

The K5 Drinking Water Station from Kinetico is certified to remove more contaminants than any other RO system.

Better water brilliantly designed

Only the Kinetico K5 Drinking Water Station gives you this level of protection: three fixed filters—a PreFilter, Reverse Osmosis Filter and PostFilter—transform water into clear, unbelievably great-tasting drinking water, while two auxiliary filters—or FlexFilters—allow for complete system customization for tackling your water's specific filtration needs.

10 YEAR
Limited Warranty

1 PreFilter

The PreFilter removes chlorine used in large-scale municipal water treatment, as well as sediment particulates down to 1/16 the diameter of a human hair.

2 Reverse Osmosis Filtration

Through a process known as reverse osmosis, water is forced through a semi-permeable membrane that filters inorganic contaminants like metals and nitrates.

3 FlexFiltration

Revolutionary dual FlexFilters provide customizable filtration to tackle your water's individual filtration needs. Use any two of the following cartridges or none—the choice is yours.

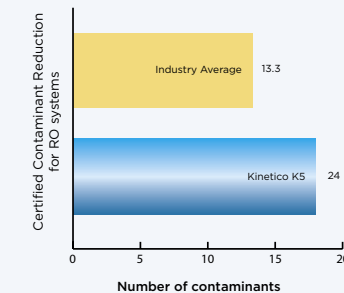

FlexFiltration Cartridges

- Purefecta® Guard** - Removes 99.99999% of bacteria and 99.99% of viruses, generating bio-pure drinking water as certified by trusted third-party regulators
- VOC Guard** - Eliminates volatile organic compounds in water such as pesticides, paints, cleaning supplies and other materials
- Arsenic Guard** - An added layer of protection for water that has been shown to contain higher levels of arsenic (such as As III) to ensure its removal
- Perchlorate Guard** - Occurring as the byproduct of certain forms of manufacturing, perchlorate has been shown to have adverse effects on the thyroid and has been detected in drinking water and ground water in 35 states
- Chloramine Guard** - Significantly reduces chloramine, a chemical used to treat approximately 1/3 of US municipal water sources
- Mineral Plus** - This additive cartridge lets you add beneficial minerals such as magnesium and calcium to your treated drinking water

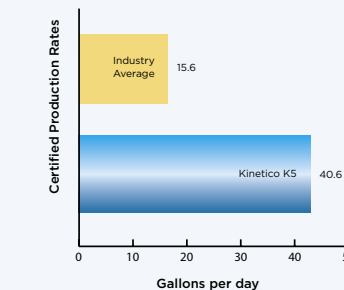

4 PostFilter

The PostFilter removes any remaining inorganic compounds that could cause foul taste or odor.

Removes More Contaminants

Higher Production Rates

Our thinking

- PureMometer®** indicates how much filter capacity remains
- MACguard®** shuts off flow automatically when filters expire to safeguard against impurities
- EverClean® Rinse** prolongs filter life by cleaning the system with the very same high-quality water produced by the system
- QuickFlo** provides consistent flow rates regardless of whether the storage tank is full or nearly empty
- Exclusive Faucet** elegantly dispenses a steady stream of great-tasting drinking water
